

Plainfield Public Schools

PROFESSIONAL IMPROVEMENT PLAN

Teacher _____

School Year _____ Date _____

The district has identified priority areas related to the instructional program and improved student outcomes: mathematics, literacy, integrated technology, and data. You are urged to assess where you are in your development in these critical areas and any other areas that you determine are in need of support. These items should be shared with your administrator during the planning session to jointly develop your Professional Improvement Plan.

The district will continue to assist all staff members to develop competencies and expand their knowledge base in the use of mathematics, literacy, data, and technology to improve instruction. Information contained in the PIP's will assist in the identification of staff development needs at the school and district level and offerings will be posted on district site at www.Mylearningplan.com.

I. Needs:

- 1.

II. Improvement Actions:

- 1.
- 2.
- 3.

III Assistance Required:

- 1.

Time Frame:

November

V Review Date:

Review prior

I acknowledge that this plan was mutually developed with the undersigned administrator.
