FIRST GRADE CURRICULUM PACING OVERVIEW

This document provides a pacing guide for instruction involving first grade students. It includes the content addressed in the first grade New Jersey Core Curriculum Content Standards (NJCCCS). It is designed to help teachers in pacing instruction of what students are expected to know and be able to use in technology for the entire year.

Purpose of the First Grade Technology Curriculum Pacing Guide

The First Grade **Technology Curriculum Pacing Guide** was formulated for the purpose of providing first grade teachers with a guide for pacing instruction throughout the year. It will serve as a “road map” to help teachers develop first grade concepts and processes through instruction and practice. The Division of Educational Services responded to the request of administrators and teachers in the District to create a guide that would serve as a resource for teachers.

Description of the First Grade Technology Curriculum Pacing Guide

The First Grade Technology Curriculum Pacing Guide specifies the New Jersey Core Curriculum Content Standards (NJCCCS) Cumulative Progress Indicators (CPIs), Objectives, and Standards/Strands taught during each instructional quarter.

- Column One: Standard/Strands
Identifies the Standard and Strands as required by the NJCCCS.
- Column Two: Objectives
Identifies the specific, measurable objectives to be addressed in lessons.
- Column Three: CPIs
Contains the NJCCCS CPIs for first grade.

Suggestions for Implementing the First Grade Technology Curriculum Pacing Guide

The role of the teacher is to:

- teach the NJCCCS content matter;
- provide classroom activities that address the NJCCCS;
- enhance curriculum by using textbooks, manipulatives, technology, and other instructional materials;
- use varying methods of instruction to address diverse learning styles; and
- administer teacher-made assessments

In addition to using the **First Grade Technology Curriculum Pacing Guide**, teachers should:

- consider intra-school collaborative planning and spiraling of the curriculum to ensure efficient and effective pacing and delivery of instruction;
- adjust pacing and discuss progress with peers;
- document questions and suggested improvement of the guide for further support and future revisions; and
- align and connect mathematics literature to support reading.
