

Color Codes Chart – Selecting Colors

Genesis accepts 6 digit hexadecimal color codes wherever it asks you to make a color choice. This table contains a set of suggested color choices that include and expand greatly upon the standard built in colors. You can select a code from this list and use it “as is” – or you can use any of these codes as starting points to come up with colors of your own.

Each code can be broken in to 3 sets of 2 digits each:

rr gg bb - Each two digit pair controls one of the three primary hues.

‘rr’ – These two digits control the amount of “red hue” in the final color, from none (“00”) to “as much as possible (“ff”).

‘gg’ – These two digits control the amount of “green hue” in the final color, from none (“00”) to “as much as possible (“ff”).

‘bb’ – These two digits control the amount of “blue hue” in the final color, from none (“00”) to “as much as possible (“ff”).

The final color is computed as: “**the amount of red hue**” + “**the amount of green hue**” + “**the amount of blue hue**” = “**final color**”.

How to Create Your Own Colors:

You can either copy a code directly out of the table below (use the codes in the left hand column) and use them “as-is”, or you can copy the code and change it until you have a color that suits you.

Creating Color “Schemes”

A ‘color scheme’ is a *font* color (the color of the letters) and a *background* color (the color of the screen behind the letters). For example: the following are color schemes:

LIGHT LEMON CIFFON ON Dark Mallard

Cornflower Blue on SEA FOAM

Depending on what you are coloring, you might want to choose a dark-on-light color scheme, as in the “Cornflower Blue on SEA FOAM” example above, or a light-on-dark scheme, as in the “LIGHT LEMON CIFFON ON Dark Mallard” example. What is important is to pick contrasting colors that will show well against each other. Non-contrasting colors create color schemes that can be hard to make out:

Sea Form on light Yellow

The main point is to pick selections and try them out: come up with your own choices.

Dark Magenta on rose pink

Flaming Orange on Light Yellow

Red Purple Brown on Tropical Green

Twilight on Blue Clue

Red Brown on Dark Fog

Color Codes:

The chart below contains a wide range of possible code colors. The names of the colors have been selected to be as descriptive as possible – or amusing, when descriptions fail - and do not reflect any “official” definitions of these colors (with the exception of red, green, blue, aqua, yellow and fushia).

<i>Code</i>	<i>Color Description</i>
<i>ffffff</i>	White (total red + total green + total blue)
<i>000000</i>	Black (no red, green or blue hue)
<i>ff0000</i>	Red (total red + no green + no blue)
<i>00ff00</i>	Green (no red + total green + no blue)
<i>0000ff</i>	Blue (no red + no green + total blue)
<i>ffff00</i>	Yellow (total red + total green + no blue)
<i>ff00ff</i>	Fushia (total red + no green + total blue)
<i>00ffff</i>	Aqua (no red + total green + total blue)
<i>0000b0</i>	dark ultramarine blue
<i>0000cc</i>	Deep Pure Blue
<i>0000dd</i>	TRUE BLUE
<i>0033be</i>	MIDNIGHT
<i>0033ff</i>	ROYAL BLUE
<i>004f96</i>	DEEP MARINE BLUE (IN THE DEPTHS)
<i>0066ff</i>	Bright Blue
<i>007499</i>	Dark Night blue green
<i>008080</i>	Dark Mallard Green
<i>008766</i>	Dark pine green
<i>009999</i>	Medium Mallard Green
<i>0099cc</i>	Tropical Pond
<i>0099ff</i>	PEACOCK
<i>00aac2</i>	Light Mallard
<i>00cc66</i>	PURE GREEN
<i>00e2ff</i>	medium blue teal
<i>00e678</i>	Spring green
<i>00ffff</i>	tourquoise
