September 01, 2020

To Whom It May Concern:

Each year the Plainfield School District is required by the Asbestos Hazard Emergency Response Act (AHERA) to notify each building occupant about the Asbestos Containing Building Materials (ACBM) in the District's buildings. Information pertaining to that notification is detailed below.

Asbestos Management begins with a comprehensive inspection by qualified trained and experienced inspectors, accredited and state approved.

To assure that all buildings are safe and in compliance with the requirements of AHERA, the District has retained the services of Karl & Associates, Mohnton, PA. This company is certified by the State Department of Health to inspect each building for ACBM and develop a plan for the management of these materials. The management plans for each building documents the location and condition of asbestos and presents a plan of action for removal and/or maintenance of these materials.

Each building has a copy of its management plan and is available for your inspection. Copies of plans for all locations are on file at the Department of Facilities and Grounds.

Every six months all potentially friable ACBM are inspected for possible deterioration. If any deterioration is found, the area is repaired and cleaned by trained personnel.

Specific details about asbestos removal activities will be announced 30 days prior to the start of any such project. Tests will be taken of the air quality during and after each removal project.

If you have any questions, please call 731-4356.

Sincerely,

*Sean Sutton*
