PLAINFIELD, NJ - Plainfield High School students participated in the College Fair held at their school on Monday.

Participating students received information on admissions, tuition and financing their post-secondary education.

More than 30 colleges and universities New York, New Jersey and Pennsylvania were in attendance. Students interested in finding out about their options with the United States armed forces were able to speak to recruiters from both the Army and Navy.

Plainfield High School's Professional Student Counselor Anthony Galarza said, "This annual event provides the students the opportunity to access information and directly talk to college recruiters and ask questions. The students are able to engage in discussions about financial aid and scholarships available to them."
